PROJECTS

BeatSync Studio– Automated Audio-to-XML Beat Synchronization Tool | [GitHub](#) | [Live](#)

Feb 2026 – Apr 2026

- Built an **Audio Beat-Detection Engine**: Utilized **Python** and **librosa** for Digital Signal Processing (DSP) and spectral flux analysis to automatically extract high-energy rhythm impacts.
- Designed a **Dynamic Peak-Picking Algorithm**: Developed an adaptive thresholding algorithm linked to a UI slider for real-time adjustments of detection sensitivity.
- Engineered Custom XML Preset Generation: Built an **XML generator** mapping frame-accurate timestamps to Alight Motion metadata schemas eliminating manual timeline keyframing.

Tech Stack: Numpy, SoundFile, Librosa

Personal Performance Analytics Dashboard | [GitHub](#) | [Live](#)

Dec 2025 – Jan 2026

- Built a personal performance analytics system using **Python**, **Pandas**, **Excel**, and **Matplotlib** to track daily learning hours, content completion, and long-term consistency.
- Developed interactive data visualizations and trend analysis, including **cumulative-progress** and **moving-average graphs**, to identify productivity patterns and visualize incremental improvement over time. Every project ends with a Tech.
- Designed an **automated performance dashboard** with productivity metrics, streaks, efficiency analysis, and data-driven insights, transforming daily activity logs into actionable performance reports.

Tech Stack: Pandas, excel, Matplotlib

CERTIFICATIONS / CERTIFICATES

JAVA Programming Great Learning	Aug 2026
Introduction to AI Infosys Springboard	Mar 2026
